

Description AUMC website support service

Participating Institutions: Amsterdam UMC (VU Medical Center, AMC,) VU and University of Amsterdam

Description: The service will enable the participating institutions and the affiliated research centers to represent their researchers and research outputs in a newly developed public website (Amsterdam UMC). This website will link back to a dedicated portal for detailed information on researchers, their research outputs, organizations, and their collaborations.

How does this pilot contribute to open science: The service supports the institutions' objectives of transparency and outreach (the AUMC public website) and promotes collaboration (visibility of expertise in website and supporting portal) across institutions and beyond. The service enables showcasing expertise and research impact, stakeholders' outreach and stimulates further collaboration, nationally and internationally.
